On Employers During Any Six Months' Insurance Period Irrespective of the Number of Deaths Or Non-Fatal Accidents, Including Total Disability

[ASSOCIATED PRESS TELEGRAM]

Columbus, O., June 19.-As of July 1, 1915, the Industrial commission of Obio will issue its new manual of rules and rates.

In this manual the commission has made some fundamental modsystem, the most important of which is the abolishment of the \$500 indiployer for the occurrence of a death and the abolishment of the \$1,000 individual fixed charge against the employer for the occurrence of a per manent total disability injury.

The revised ruling of the commission, as of July 1, 1915, reads, in substance, that in no given months' insurance period shall—the preferred rate of any employer be increased more than 24 per cent., irrespective of the number of deatlis or non-fatal accidents, including permanent total disability accidents, the employer may have experienced. In other words if the preferred rate of a given employer is \$1.00, his rate under no condition can exceed \$1.24; if his preferred rate is \$1.50, it can never exceed \$1.62; if his preferred rate is \$.25 under no condition can it exceed 3.31. Under this revised system, an employer may even have a death costing the fund as much as \$2500 or a permanent total disabilas \$15,000 and yet not have his preferred rate increased at all, but under no circumstances can his preferred rate be increased more than 24 per cent. It is the belief of the STATE MONEY IS commission that this revised system will not only stimulate acident prevention as effectively as the present system, but will also be more satisfactory to the employers.

The commission has made another important change of the present rating system with reference to the contractor's schedule.

The rate of each classification within the contractor's schedule, as of July 1, 1915 will contemplate the total losses of the class plus a loading sufficient to permit of the operations of a merit rating system on the basis of reward.

A credit premium factor has been erected for each classification within this schedule. Where a contracting employer can reduce the cost of his compensation losses below the factor established for his classification, he will receive a credit premium in the amount of 10 per cent. of the difference between his individual compensation losses and those specified in the factor established for his classi-

The new manual of rules and rates effective as of July 1, 1915, and the revised rules and regulations as under Section 22 of the law will be printed and ready for distribution by July 1, 1915, or a few days thereafter.

Washington, June 19. - Differences between General Carranza and General Obregon, his principal commander; disension in the Carranza cabinet and Carranza's removal of his headquarters to the isolated safety of the fortress San Jan De Uloa, in the harbor of Ver Cruz-all reported to Washington today, brought the Mexican situation into new force.

Official dispatches to the state department say these developments threaten the solidarity of the Carranza movement.

Occupation of Mexico City by General Pablo Gonzales and Carranza troops has been postponed pending he cabinet reorganization.

Officials here have no complete indication as yet as to the meaning of the cabinet crisis, but overnight, it was said a new situation had arisen which may have an important effect on the Mexican problem as a whole.

Latest advices were that four of the cabinet of eight had resigned and that Obregon had insisted in a telegram to Carranza that they be retained and that a fifth member. dismissed. A newspaper article by the latter, attacking some of his colleagues in the cabinet led to the

Officials here are concerned to know whether questions of policy are involved but all information so far indicates personal differences.

President Wilson intends to wait several weeks for the situation to shape itself more clearly before any definite steps are taken in the new policy announced in his recent statement to the factions. He wants to see a coalition of the various branches of the original constitutionalist movement.

Elizo Arrendondo, Carranza's representative here and Charles A. Douglas, legal advisor, go next week to Vera Cruz to lay before Carranza their impressions of the future development of President Wilson's policy.

This contemplates her using only her normal bunker supply, but with her emergency bunkers filled, she could steam an additional 5000 miles further. In other words, the California will be able to steam about twice as far as the Wyoming."

The secretary said that the "back bone of the navy" is still the powerful dreadnaught, but declared the navy was keeping abreast of progress in the building of submarines and destroyers. He also referred to the laying of the keel at the League Island navy yard today of the largest transport yet authorized by congress, and of the development of the

navy aviation school at Pensacola, Ships of the line, like the Arizona, are built to give and receive punishment in sea battles. Their mission has little in common with that of the battle cruisers which have been the largest ships to engage each other during the European war. Speed is sacrificed in the construction of the battleships to weight of armor and against such a ship as the Arizona with her broadside fire from twelve 14-inch guns and protection of more than a foot of the toughest steel that can be made around the vessel's vital parts like a wall, a battle cruiser would be helpless and zona, ship to ship.

The range of the Arizona's guns is from 12 to 13 miles as they will be set in her turrets, or as far as her gun-pointers and observers can see Arizona's main battery will have a maximum elevation of nearly twenty degrees. It would be possible, it is said, to almost double that elevation line of march. and add miles to the range of the guns; but already they can shoot and hit forther it is probable than they would ever be called upon to do. The Arizona will carry the three

gun turrets which have been developed by American naval constructors, her twelve big rifles being housed in four turrets, two forward and two after. In addition she will have a secondary battery of twentytwo 5-inch, long range rifles for defense against destroyers torpedo boats and submarines. The big guns can be fired over either broadside and around the entire circle with the exception of an arc of less than thirty degrees directly forward for the after turrets and directly astern for the forward turrets. Four of the secondary battery guns, two on each side, are so paced that they can fire three degrees across the ship's bows. taking the place of bow chasers of the old wooden ship days.

Compared to the Arizona the old battleships of the Oregon class are almost like toys. The new ship could engage a fleet of three of them at the same time, turning upon each as many guns as it could bring to bear and her guns would be bigger and of longer range. In addition she could steam away from them or overtake them at pleasure, developing 21 knots against their 16 or 17. The remarkable thing about the great increase in size and gun power, however, is that each of the smaller ships would need as many or more men

completement of 915 in her crew. The new sea fortress as she took the water today cost more than seven million dollars. That was for and armor will cost as much more and other equipment necessary to fit her for duty will add another mil lion to her total cost, which will be about \$16,000,060. She is longer and wider than any but the newest trans-Atlantic liners. If it is desired to put her through the Panama canal the locks and bends in the channel will be taxed almost to the

Against the New York's displace ment of 27,000 tons, the Arizona will displace \$1,400 tons and will measure 600 feet in length and 97 feet 6 inches in width. She will mount twelve 14-inch guns to the ten fourteens carried by the Texas, and they will be three to a turret, as aboard the Pennsylvania.

Miss Ross is "A Girl From the Hills of Arizona." She is a typical representative of Arizona's younger generation, who are fast supplanting the pioneer women of the past two generations. Miss Ross, who has just passed seventeen, is of medium stature, being five feet three inches in height. She is of a decidedly petite type, with blue eyes, light brown hair and vivacious manners. She has an older brother, who is at present a midshipman at the Naval Academy at Annapolis.

SPECIAL TRAIN TO BRING MASONS FROM MT. VERNON

Mt. Vernon, O., June 19.- Through the efforts of committees from Mt. Zion and Thrall lodges, working with Mr. L. E. Hart, B. and O. agent at Fredricktown, a special train from Fredericktown to Newark has been secured for Thursday. June 24, the date of the dedication of the new

Masonic temple in Newark. The train will be made up of five roaches and a baggage-car. It will leave Fredericktown at 9:30 a.m. and arrive in Newark at 19:30 a.m. The train will leave Newark, returning, at 11 p. m. The regular fare will be charged. The train will stop at ali intermediate points including Mt. Vernon, both going and returning.

It was necessary for the committee to make a guarantee and tickets will be put on sale at once. Mr. Hurt reports that there will be 100 or more trom Fredericktown, including 30 or 40 from the Chesterville lodge.

From Mt. Vernon it is expected that there will be more than 200 members of Clinton Commandery, No. 5. K. T., and Mr Zion lodge, No. 9, F. and A. M., both of which bodies will participate in the parade at Newark. The Mt. Vernon bodies will be headed by a 14-piece land.

Arrangements ar under way whereby the midnight trains on the Pennsylvania may la stopped at Danville and Centerburg for the accommodation of the lodge members from those points who may wish to take advantage of the special train. The in brightest weather. As previous F, and A. The Gospel Oak.

In the village of Polstead, Suffork, England, stands a famous oak which the rector has proved to be 2,000 years old. The tree has a girth of thirtysix feet and has been known always as the gospel oak, since under it the first Christian missionaries preached to the heathen Saxons thirteen centuries ago. This event is commemorated each year by a special service held under the tree.

FOUR TIMES NATIONAL AMA-TEUR GOLF CHAMPION TAKES OPEN TITLE

After Consistent Two Days' Play-Contest Was Won by Only a Single Stroke.

Short Hills, N. J., June 19 .- For the second time in the history of the United States Golf Association the national open championship was won by an ameteur yesterday. After a long and arduous test of 72 holes medal play, which began yesterday and ended late today, Jerome D. Travers, of Upper Montclair, N. J., won the title with a splendid score of 297 strokes,

Travers has won four national amateur and five metropolitan as well as several other important golf championships, but his neart's desire was gratified when he added the "open" to his long list of victories.

There was no fluke or thaw in the

quality of goil which the winner displayed during the week. He won his honors eleverly from a field of 140 of the best professionals and leading amateur golfers in this country. The competition was international in character, although the European war had prevented Vardon, Ray and seven other English and Scotch experts from coming to take

Travers played steadily all through the two-day test, and, while he made mistakes at times they were in greater part quickly rectified by clever recoveries. In the final round today Travers knew that he had a hard task to beat the total of 298 made by the Boston home-pred profssional, Tom McNamara. He had taken 39 strokes going out, and was forced to equal par, or 37, for the last nine holes in order to win by a zingle stroke. McNamara also played a great

game, and so did the third man, Robert G. MacDonald, always prominent contender, while Walter C. Hagen, of Rochester, who won last year, was unable to keep up with the leaders and finished in a tic with seven other professionals.

These eight, with scores of 306 each, divided the ninth and tenth ark this season. money prizes, while Travers won the honor, a trophy specially donated by the association.

Chick Evans, the young Chicagoan, who holds the Western amateur title also played disappointingly, although he finished 10 strokes ahead of Onimet who finished in

A Simple Constipation Remedy-Try It

For quick, positive relief from constipation, sour stomach, biliousness, inactive liver, bad breath, and all the ills that follow them nothing as yet has been found to quite equal that old, time-tried compound of may-apple root, sloes

and jalap.

Recognized as one of the standard remedies, physicians daily prescribe it, many preferring it to all others, and especially calomel. They like it because, being purely vegetable, it's not nearly as harsh as calomel; it never gripes; is never followed by any of the dangerous after-effects that so often result from the use of calomel.

This standard remedy, ready-prepared, may now be had under the name of Sentanel Laxative Tablets. Be sure you get the original Sentanel Laxatives, put up in the box that has the picture of the soldier on it. In this form it is much more convenient and easier to take than in the old-fashioned powder or capsula form—cheaper, too; a 10c box of Sentanels should last one several weeks. A physician's sample nackage (4 doses) free to any one answering this advertisement. The Sentanel Remedies Co., 801 Madison Ave., Coving-

Ouarrel of Squire **Bull and His Son** Jonathan

An Old Time Fourth of July Allegory

By JAMES KIRKE PAULDING

OHN BULL was a choleric old fellow who held a good manor in the middle of a great mill pond and which by reason of its being quite surrounded by water was generally called Bullock island. Bull was an ingenious man, an exceedingly good blacksmith, a dexterous cutler and a notable weaver besides.

He also brewed capital porter, ale and

small beer and was, in fact, a sort of

Jack-of-all-trades and good at each. In addition to these he was a hearty fellow, a jolly companion and passably honest as the times went. But what tarnished all these qualities was an exceedingly quarrelsome, overbearing disposition, which was always getting him into some scrape or other.

The truth is he never heard of a quarrel going on among his neighbors but his fingers itched to take a part in it, so that he was hardly ever seen without a broken head, a black eye or a bloody nose.

Such was Squire Bill, as he was commonly called by the country people, his neighbors-one of those odd, testy, grumbling, boasting old codgers that was black satin . . . the skirt was never get credit for what they are because they are always pretending to be what they are not. The squire was as tight a hand to deal with indoors as out, sometimes treating his family as if they were not the same flesh and blood when they happened to differ with him in certain matters.

One day he got into a dispute with his youngest son, Jonathan, who was familiarly called Brother Jonathan. He fell upon him and beat him soundly. After this he made the house so dis agreeable to him that Jonathan, though as hard as a pine knot and as tough as leather, could bear it no longer.

Taking his gun and his ax, be put himself into a boat and paddled over the mill pond to some new lands to which the squire pretended to have 🕆 some sort of claim. Jonathan intended to settle the lands. When he got over he found that the land was quite in a state of nature, covered with wood and inhabited only by wild beasts.

But, being a lad of spirit, he took his ax on one shoulder and his gun on the other, marched into the thickest of the wood and, clearing a place, built a log hut. Pursuing his labors and handling his ax like a notable woodman, he in a few years cleared the land, which he laid out into thirteen good farms, and building himself a large house, which he partly finished, began to be quite snug.

and stingy and besides was in great than it wants. want of money on account of his having lately been made to pay heavy in the intrinsic intrinsic in the intrin damages for assaulting his neighbors and breaking their heads-the squire, I say, finding Jonathan was getting well to do in the world, began to be very much troubled about his welfare. So he demanded that Jonathan should pay him a good rent for the land which he had cleared and made good for some

He made up I know not what claim against him and under different pretenses managed to pocket all Jonathan's honest gains. In fact, the poor lad had not a shilling left for holiday occasions, and had it not been for the filial respect he feit for the old man he would certainly have refused to submit to such impositions. But for lace, Mrs. Vera Taylor; in the sound all this in a little time Jonathan grew up to be very large for his age and became a tall, stout, double jointed, broad footed cub of a fellow, awkward bring on cramps of the stomach and in his gait and simple in his appearance, but having a lively, shrewd look and giving the promise of great strength when he should get his

and a second class railway carriage, going from Lausanne to Paris, I once passed a night of conflict. On my side were a Swiss who spoke English and an Englishman who didn't speak. Our opponents were two members of a Latin race. They wanted the windows shut. We wanted at least one window open. Our common cause drew the three of us together. At first the Englishman's expression had seemed to wonder whether the Swiss and the American were quite worthy to prefer fresh air. As the night were on this expression waned, and I thought I detected a trace of sympathy in the glances be sparingly aimed at us.

In answer to my question the Swiss explained his mastery of the English language by saying he had learned without a teacher, just by sitting near an open window in a tub of cold water. At this the Englishman almost pipe and began to hunt through his pockets for matches. The Swiss offered him a box. "Thank you," he said gravely; "I prefer my own," and went on hunting .- New Republic.

Colors of the Opal.

In judging an opal color is of the greatest importance. Red fire or red in combination with yellow, blue and green is the best. Blue by itself is quite valueless, and the green opal is not of great value unless the color is very vivid and the pattern very good. it must not run in streaks or patches, alternating with a colorless or inferior quality. Pattern is an important factor, the several varieties being known as "pin fire" when the grain is very small, "harlequin" when the color is in small squares, the more regular the better, and the "flash fire," or "flash opal," when the color shows as a sin-. She wore black patent gle flash or in very large pattern. Harleguin is the most common and is also popularly considered the most beautiful. When the squares of color are regular and show as distinct minute checks of red, yellow, blue and green it is considered magnificent. Some stones show better on edge than on top. -Exchange.

Barrels.

A barrel is not always a barrel, for according to a Massachusetts judge, the matter of state lines has considerable to do with it. Some time since a Boston man purchased 200 barrels of sweet potatoes in the state of Maryland. When the sweet potatoes arrived in Boston the purchaser sold one barrel just as it had come from Maryland, but it appears that the barrel weighed only 129 pounds instead of 150 pounds, the legal weight in Massachusetts. In that state when a person buys a barrel of potatoes the weight must be not less than 150 pounds. The Massachusetts courts ruled that the purchaser of the Maryland sweet pothe barrel that was underweight, although the barrel was a legal one in Maryland. Therefore a barrel is not a barrel in Massachusetts when it weighs less than 150 pounds.-Utica

[rving's Intensity.

The piercing eyes and intense expression of Henry Irving once had the effect of ranking a fellow actor altogether forget that he was on the stage at all. It occurred in Manchester during a performance of "Macbeth," and in the scene where Macbeth says to one of the murderers, "There's blood upon thy face." Irving put so much earnestness into his words that the murderer forgot his proper answer "Tis Banquo's, then") and replied in

startled voice: "Is there? Great Scot!" He fancied, as he afterward said, that he'd broken a blood vessel.

These are transformed chemleally into from 250 to 300 intermediate products, which in their turn yield about 1,200 chemically distinct dyestuffs. Among the processes employed are high temperatures, great pressures and low refrigeration.

VEGETABLE CALOMEL

Vegetable calomel, extract of the root of the old-fashioned may-apple plant, does not salivate. As a liver stimulator, it's great. It's a perfect substitute for ordinary calomel (mercury); in fact, it's better, because its action is gentle instead of severe and irritating - and it leaves no mean, disagreeable aftereffects. Physicians recognize this

and prescribe may-apple root (po-dophyllin, they call it) daily. Combined with four other standard, all-vegetable remedies, mayapple root may now be had at most any druggist's in convenient sugarcoated tablet form by asking for Sentanel Laxauves. New York, June 19.—Except for another advance of 1% in Baldwin Locomotive to the new high record of 66, carly dealings in today's stock market were light to the point of insignificance. Baldwin's rise was based on rumors of the signing of further large war contracts. One block of 1800 states changed hands at 65. Other war specialties showed little change from yesterday's close. United States Steel was the only leading stock to manifest animation, opening with a small loss which it soon regalaned. Other leaders were slightly higher when quoted at all. Among the minor

War smares were the only features of interest in today's very dull stock market. Baldwin Locomative made a new high record at 66¼ and a few other specialties of that class rose I to I points. Some of the market's general trend may be taken from the fact that declines in Baldwin Locomotive and distillers' securities were much larger than the overturn in United States Steel and other usual lavorites. Distillers at 28¼ also made a high Distillers at 28% also made a high record price. There was scatterly and demand for the high class railway issites, some of which remained undicted for the entire session. The closing was irregular. Bonds were steady.

LEGAL NOTICE. John Crouch and the unknown heirs of the said John Crouch, Andrew Stler and Almira Siler and the unknown counted also against the bear side of the market are. Opening prices which tonged from loc to Ir higher, were followed to some additional gains, and then a reaction all around.

Subsequently a rally took place, infinenced somewhat by reports of cropbackwardness in the spring wheat states. Absence of all export demand, however, brought about another setback. The lose was weak at the same as last night to lee down.

Corn hardened owing to unfavorable weather. The fact, however, that vegentine offers were finding takers in New York operated later as a veight on market. After starting later are domestic lop was possible led to a fresh upturn, but the bulge failed to last. The close was weak at late level.

Smallness of receipts had a steadying effect on oats. Trade though lacked volume. Provisions advanced with hogs. However, buying was not at all urgent.

Desiness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear.

There is only one way to cure deafness and that is by constitutional remedies. Peainess is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deatness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Pollars for any case of Derfiness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

They range in complexion from a brunette banana to a blond canary bird. They offer to sell you anything from a philosopher's stone to a cypress shingle sawed out of a sunbeam.

Cash Versus Credit.

It seems unbelievable, but, it is nevertheless a fact, showing the entire lack of any sense of justice, that many people regard their local stores as merely institutions of accommodation. When these people have cash to spend for Wemen, 17 W. Church St. it goes to the faraway mail order houses, but when times are dull, when they are sick or out of work or during the season when farmers are not turning their produce into cash, what do they do? Do they write to the catalogue house and ask for credit?

If they did do you think they would get it? Not on your life! Those concerns must have cash, must have it in advance, must have it before you can even see the goods you buy. The consumer sends his money and then sits down and waits until the mail order house gets good and ready to fill his

order. But when home people want credit or favors of any kind they hustle off to their home merchant, very obligingto charge it, expecting him to wait at least from one to six months for his Give us a trial.

good roads, the charities. They help to pay the local taxes, and by building up

The habit (because it is a habit, pure and simple) of buying from out of town is formed on the theory that one can buy for less money. The idea is as erroneous as Acsop's fables. One may buy a few things cheaper by mail than he can buy at home, but they are few, and it is a well-known fact that the quality is not really expected from the far-off stores. Ninety times out of a hundred the same goods could be bought of the home merchant for the same money and oftentimes less money if you gave the local merchant a chance to figure with you.

The Shy Caterpillar. The caterpillar, though a sociable creature, tries to keep out of everybody's way. Some species hide on the under surface of leaves, others on the stems or blades of grass, which serve them as food; others, again, build little nests for concealment or lie snugly hidden between the curled edges of leaves, which they draw close together until the opposite edges meet. The caterpillar is a sociable creature in his own family. He knows that there is safety in numbers, and you will find whole companies feeding side by side while keeping a sharp lookout for their bird enemies, but when a caterpillar is by himself he scarcely dares to move for fear of attracting attention. Hannah Riddall Moore, wite of the late Jesse R. Moore, passed away Friday at midnight at the home of her daughter, Mrs. Henry S. Fleek, in Hudson avenue. She was the daughter of John Riddall and Julia Ann Johnson, and was born in Cleveland, O., Nov. 14, 1822.

Her father passed away when she was a child five years old, leaving her mother with a large family of children. Amos Holiday and wife were devoted triends of John Riddall and wite and begged to take little Hannah and adopt her for their own, as they were childless. The mother refused their request but allowed her to go to live with them. At the age of 14 she moved with the Holliday's to Newark, and in 1839 she was married to Jesse Richard

PRÓM OBIO SUPREME COURT QUIETS "OLD GRAVEYARD" TITLE IN THE CITY

improvements May be Made and the Premises be Used Just as Heretofore,

County Clerk Bert O. Horton today received a mandate from the Supreme court in the old grave yard ases which establishes finally the rights of the city of Newark to this property and holds that the city has complete title to use the ground as it is now used but not otherwise. The order of the Supreme Court is as follows:

This cause came on to be heard upon the transcript of the Record of the Court of Appeals of Licking county, and was argued by counsel. On consideration whereof, it is ordered and adjusted by this court, that the judgment of the said Court of Appeals be, and the same hereby is eversed; The court finds that the ourt of appeals erred in its concludons that the plannin has accounted said premises as a graveyard, and a said premises as a graveyard, and a said premises as a graveyard. ition of plaintiff; in entering a decree quieting the title of the defendants in said premises as against the plaintiff, and in requiring the plainiif to remove water pipes, poles, electric light wires, lights, fountain, cement walks and cement steps from said premises.

"The court finds that, notwithstanding interments have not been made in said graveyard for many ears, and that many bodies previously buried there have been removed there from, it appearing that many bodies still remain, there has many bodies still remain, there has not been a complete abandonment of said premises to purpose inconsistent with its preservation as a grave

The court further finds that the mprovements made by the plaintiff re not inconsistent with such use and preservation.

"Coming now to make the decree which should have been entered herein by the court of appeals, it is hereby ordered and decreed that the title of the plaintiff in and to said preprises-which shall be preserved and improved as a graveyard. but not otherwise, be and hereby is quieted as against the defendants, and all persons claiming through or under them, and the amended cross-petition of the defendants is dismissed. and the costs of this proceeding are adjudged to defendants in error."
